

The Essex County Council (Basildon Borough) (Prohibition of Waiting, Loading and Stopping) and (On-Street Parking Places) (Civil Enforcement Area) (Amendment No.54) Order 202*

Statement Of Reasons

Brock Hill, a local road, running from Wickford to Chelmsford northbound, is located within the area of Runwell, Chelmsford, SS11 7NW. An existing bus stop is located adjacent to the give way markings of the priority working system along Brock Hill, north of Alderney Gardens. Buses parking on the stop has been an issue for some time – it is a well-used stop, but buses cannot align to the kerb edge, when cars are parked close by. It is proposed to relocate the existing stop further south, away from the give-way junction.

To facilitate the relocation - and following Road Safety comments - it is proposed that Double Yellow Lines are installed at the junction of Brock Hill & Alderney Gardens, and between the new bus stop location and existing priority working system. This will prevent any vehicles from parking nearby and causing visibility issues around a stationary bus at the stop. This work has been commissioned by the ECC Passenger Transport team. This area has above average pedestrian levels due to the proximity of local businesses just southwest of the junction. As such, the proposal seeks to improve safety of both road users and pedestrians in this area by installing Double Yellow Lines.
