

Basildon and Thurrock University Hospital Access Road Improvements

This scheme aims to improve journey times to and from the hospital by widening the access road to two lanes in both directions and the car park exit road from one lane to two lanes.

- Works are programmed to start in early August 2015 and are scheduled for completion by the end of December 2015.
- Drivers and patients can expect delays during the works and should allow extra time when attending appointments.
