Dear Resident,

A133 Cymbeline Way and Colne Bank Avenue – Invitation to Public Information Event

As part of a Local Growth Fund (LGF) scheme we are redeveloping and transforming Colchester's roads by improving local highways, footways and cycle ways to assist the transport network in managing the expected increase in movements generated by the housing and business growth in Colchester. In July 2014 Government announced the SELEP Growth Deal resulting in a £150m programme to be delivered from 2015/16 to 2020/21.

Our proposals include:

- Widening the section of Colne Bank Avenue between Albert Roundabout and Colne Bank Roundabout to provide two lanes in each direction. Engineering works will also include essential bridge strengthening improvements to Temple Bridge and Temple Subway.
- Relocating the existing pedestrian/ cycle crossing on Cymbeline Way (west of Colne Bank Roundabout) and improving alternative pedestrian and cycle links within the area.

We would like to invite you to come and view our plans for these schemes and ask any questions that you might have. We will be holding a public information event on **the 21st October 2015** from **2pm – 8pm** at **Colchester Institute, Sheepen Road, Colchester, CO3 3LL**, and we would be delighted to see you there.

Yours sincerely,

Highways
